

DE
Rebus Cælestibus
OR AN
EPHEMERIS
FOR THE
Year of Humane Redemption
by Jesus CHRIST, 1662.
WHEREIN
You have the Motions of the
SUN and MOON,
The two Great and glorious
CÆLESTIAL LIGHTS.
With the mutual ASPECTS
of the PLANETS.
TOGETHER
With Observations thereupon, and
ASTROLOGICAL JUDGEMENTS
upon the Ingress of the SUN into
the Equinoctial and Solstitial
Points of HEAVEN.

By WILLIAM ANDREWS
Student in ASTROLOGY.

LONDON Printed by Tho. Ratcliffe
for the Company of Stationers, 1662.

TO THE
TRULY NOBLE
AND
Most faithfull Lover of Learning,
CHRISTOP. LAYER,
OF

Bury St. Edmonds, in the County
of *SUFFOLK*, Esq;

WILLIAM ANDREWS,
(Out of GRATITUDE, for many
FAVOURS, and CIVILITIES, received,)
HUMBLY presenteth these his This YEARS,
Astrological OBSERVATIONS.

Aug. 21. 1662. Imprimatur, G. Wharton.

TO THE R E A D E R.

E V E N Times have we been already upon this account, and this present Treatise, of this year, 1661, is the Eighth Time of our appearance in publick. WE have in this ensuing Discourse of this year, 1661, taken into serious consideration, the most

Material CONFIGURATIONS, of Heaven now in force; both past and present, and especially of those happening this YEAR, wherein we have delivered unto the world, A brief account of those Things which are thereby signified, and of the influence of the STARS, upon several Kingdoms and Nations.

We have also made a very strict disquisition into the several Positions of the heavenly bodies, not only at the ingress of Sol in *Aries*, but also at his Ingess in the other three Cardinal Signs, viz. *Cancer*, *Libra*, *Capricorn*, and have modestly delivered our Astrological Judgements thereupon. We have in this work inserted a Tide-Table, as being of great use. I am

August, 6.
1661.

William Andrews.

The dominion of the Moon in mans body passing under the Twelve SIGNS.

V Aries head and face.	Libra reins and loines.
♉ Taurus neck and throat.	♏ Scorpio secret members.
♊ Gemini arms and shoulders.	♐ Sagittarius thighs & hips.
♋ Cancer breast and stomach.	♑ Capricorn knees.
♌ Leo heart and back.	♒ Aquarius legges.
♍ Virgo bowels and belly.	♓ Pisces feet.

The Names and Characters of the 7 Planets,
with Dragons head and taile.

♃ Saturne	♇ Jupiter	○ Sol, or the Sun,	♀ Venus
♁ Mars			☿ Mercury
♈ Dragons head.			☽ the Moon
♉ Dragons taile.

The Use of the Tide-Table.

If you desire at any time to know when it will be full SEA, or high Water in any of those places mentioned in the TIDE-Table foregoing. Then have we course to the other foregoing Table, viz The Table of the Moons age, &c. and there find the MOONS Age on the day and month desired according as you are therein directed, then have recourse to the Tide-Table, with the age of the Moon, which being found in proper Column, under its Tide in the Column under the place you look for, in the common Angle you shall have the time of Fullsea in hours and Minutes.

Last quarter 2 day 42 minutes past noon.

New Moon 10 day 17 minutes past 4 morning.

First quarter 16 day 23 minutes past 11 at night.

Full Moon 24 day 42 minutes past 5 morn.

JANUARIES Observations.

THE Effects of a turbulent opposition of Mars, and the Sun out of Capricorn, and Cancer at the very latter end of DECEMBER last, is now operating, and also the malevolent configuration of Saturn and ♀, out of ♀ and ♀, which doth import somewhat of consequence, touching those PEOPLE, inhabiting in those Kingdoms or Regions under those celestial Asterisms. We conceive that the Septentrional parts of the world, are chiefly concerned thereby.

As unto the present Face of Heaven, it appeareth calm. Venus is in Δ to ♀, ♂ and ♀. Mars and Jupiter are also in Δ. The ☽ in * with Saturn, and so is ♀. Mars and Mercury are in ♀, and ♀ and Sol are in □.

Those sturdy aspects, out of watery signs before mentioned, threateneth, and doth portend Boisterous Weather at sea, or upon the Northern and Southern Coasts sudden storms. — Some loss by Pirates. From the West Indies News is expected. The noble Sea men in many Countries are honoured: Have imployments. — The Tartar and Moscovite are unquiet.

Last quarter 1 day, 42 minutes past 10 morning.
 New Moon 8 day, 17 minutes past 4 afternoon.
 First quarter 15 day, 13 minutes past 8 morning.
 Full Moon 22 day, 49 minutes past 10 at night.

FEBRUARIES Observations.

VARIETY of Action in many Kingdoms, Distempers and Controversies appear eth betwixt several Nations, yet notwithstanding great endeavours are made to bring some lofy Nations into perfect unity and concord one with another: Perilous Diseases do now seem to be much feared; GOD in mercy divert this Judgement.

Turbulent spirits not satisfied. Loss, &c. and uncomfortable Action on foot in Southern Countries.

VENVS and Mars are in □, So and Mercury also are in □ of Saturn; The Sun i. joyned with Mercury, and is Δ with Mars and Jupiter, ♀ likewise is in Δ with ♂ and ♀. Mars now becomes Direct in motion in Cancer, Jupiter turns retrograde in Scorpio.

GOOD and pleasant news arrives from sundry parts, Mars is strong, the English Nation in a most gallant posture; Are a Terror to their Enemies, in what part soever of the world they manifest themselves. Many Missives from Foreign parts.

Last quarter 3, day 23 minutes past 3 morning.

New Moon the 10 day 22 minutes past 2 morning.

First quar. the 16 day 16 minutes past 6 at night.

Full Moon 24 day 48 minutes past 3 afternoon.

MARCHES Observations.

THIS moneth begins with a friendly Aspect of Jupiter, and Mars out of \textcircled{M} and \textcircled{S} , which seem to portend much good. The noble SEA-MEN of several Countries now are very highly respe&ced, and employed. Many Fleets or Navies are at SEA : Persons employed and intrusted at SEA, or about Sea-Affairs, are successfull, and receive much contentment ; we mean here in those of our own Nation. An Inclination of some Overtures for peace, or endeavours are on foot, to reconcile and unite some potent Princes of Europe : We shall perhaps now hear of many Robberies and Pirats, many Thefts, and such like actions, will be now frequently committed in several places. Mars and Mercury are in \square , and twice doth Venus oppose \textcircled{U} . The last opposition being by Retrograde motion, POLLAND is concerned hereby : Great preparations for Sea, or the setting out of many ships upon eminent occasions.

Last quarter the 1st day, 7 minutes past 5 at night.

New Moon the 8th day, at 11 in the forenoon.

First quarter the 15th day, at 6 in the morning.

Full Moon the 23rd day 11 minutes past 9 morning.

APRILS Observations.

FROM some Northern and Eastern Countries and Kingdoms comes plenty of intelligence, all relating of some material action, near manifestation in those places under Cancer and Scorpio : The *Venetians* are active against their PUBLICK enemies, and perhaps may be favoured with a Victory in this moneth.

The Sun and Mars is in □ aspect, and so is Mars and Venus.

We have two Conjunctions, viz. of Sol and Mercury, and Sol and Venus; the one in Aries, the other in Taurus. The Sun doth also oppose Jupiter, and ♂ passeth out of ♈ the 16 day, and enters the Cholerick sign Leo.

We may mistrust some sudden shipwrecks, or many Pirates upon the Northern Seas; The motion of some Army or Armies towards the Eastern parts of the world, some cross business discovers it self in those Regions under Taurus.

Last quarter 1 day, 13 minutes past 3 morning.
 New Moon 7 day, 43 minutes past 6 afternoon.
 First quarter 14 day 48 minutes past 7 afternoon.
 Full Moon 23 day 54 minutes past 11 at night.
 Last quarter 30 day, 34 minutes past 10 beforenoon.

M A Y E S Observations.

The Heavens are in no pleasant posture at this time, Nor are there any benevolent Configurations of the Stars. *Mercury* and *Venus* oppose, *Jupiter* and *Mars* is in \square unto him, besides \varnothing opposeth *Saturn*, and is in \square with *Mars*, and the Sun opposeth *Saturn*, so that we have not one friendly Aspect this Month.

F R O M Foreign parts comes much News. The unsettled desires of some Nations, break forth into some material Action, In *Italy* or the Countries adjacent somewhat of concernment happens; so likewise at Sea, amongst some Navies, and that perhaps in the *Spanish* Fleets, A report of clashing at Sea, or some Sea Fight, towards the *Turkish* Coasts, Various Rumours spread abroad from *Flanders*, *Poland*, *Ireland*; &c.

Some sudden distemper breaks forth in some great populous City in *Europe*. Treacheries discovered, sudden fires in many places, infectious Air, causing many sundry diseases to afflict mankind. Foreign Countries much employed, especially those under *Sagittary*, are active.

JUNES Observations.

Near these Times, many Treaties and Transcendent Negotiations are managed, and carried on, in divers KINGDOMES and COUNTRIES.

The Sun and Mercury are in Conjunction in *Geminis*, and *Mercury* applies to a Δ of *Saturn*, *Mars*, and *Jupiter*. *Saturn* and *Mars* are in \square , And *Saturn* by a Retrograde Motion, comes again into *Scorpio*, and leaveth *Sagitary*, for some time. We have a Δ of *Sol* and *Jupiter*, a *Sextile* of \mathbb{V} and *Mars*, an δ of *Saturn* and *Venus*, and a \square of \mathbb{V} , and *Mercury* --- The Sun enters *Cancer*, the 11. day making the longest day and shortest night — The day containing above 17 hours, and the night about 7 hours and half.

Great Labour is now taken, and sundry Agents employed to unite some dissatisfied Nations. Where Armies are near, much action happens. A sudden fear possessest a Foreign people, who are now much molested by their Enemies.

1662.

July hath XXXI Dais.

New Moon 5 day 16 minutes past 11 before noon.
 First Quarter 13 day 36 minutes past 4 morning.
 Full Moon 20 day near mid-night
 Last Quarter 8 day 6 minutes past 9 at night.

JULY'S Observations.

ACTIONS of importance are in hand, and near manifestation in the Western and North-west parts of Europe, An appearance of sudden distempers in those REGIONS under ♈ and ♉ occasioned by the obstinatenesse and perversenesse of some Hot-spirited people, secret Plots discovered. The Sun and ♀ are in △. Mercury is in * wito ♈, and in a □ of Saturn, Sol and Jupiter, are also in □ and so is Mars and Venus And Mars is in * of Saturn.

Intelligence from IRELAND, POLAND, SCOTLAND—and several other parts of Christendome.

The opposition of Saturn and Venus in June was in the 10. and 4. Houses of Heaven at the SOLSTICIAL ingress —— The position of Saturn in Scorpio, and his passage there-in till this month, portends many Sea-storms. The Turk receives losse in this month, perhaps some Sea Fights or clashing at Sea, betwixt some Navies; sicknesses, or any unhealthful time much feared.

1662. August hath XXXI Daisies.

New Moon 3 day 10 minutes past 10 at night.

First Quarter 11 day 45 minutes past 10 at night.

Full Moon 19 day at 10 in the morning.

Last Quarter 26 day 45 minutes past 2 morning.

AUGUSTS Observations.

The Affairs of *Europe* in this Month, doth appear various, uncertain, and mutable, many false Reports are spred abroad. Rumours variously dispersed. From *Italy*, *Rome*, and the places adjacent, and also from some Northern Countries News arrives. The State of *Venice* or that people may prosper, and be blessed with Gods successe at Sea towards the middle of the Month.

The Stars are thus disposed, viz. \textcircled{b} twice in \square of *Mercury*, and also once in \square of the *Sun*; the *Sun* and \textcircled{z} in σ in Ω . A Quartile Aspect betwixt *Jupiter* and *Venus*, *Sol* and \textcircled{x} in *Sextile*, \textcircled{y} in *Trine* to *Saturn*.

The Configurations of HEAVEN are of a moderate and an indifferent calm nature; yet are there one or two hateful Aspects.

Untruths, gorgeries, lies, &c. are now raised by a giddy-people in some Regions. Some Sea-storms discourages some noble Sea-men, yet many receive much comfort in their Sea-imployments, and partake of good Benefit by their Voyages.

1662. September hath XXX Dales.

New Moon 2 day at Noon.

First Quarter 10 day 55 minutes past 3 afternoon.

Full Moon 18 day 32 minutes past 5 morning.

Last Quarter 24 day 30 minutes past 10 before noon.

SEPTEMBER S Observations.

A Serene Temper of Heaven, most friendly Aspects, not one malicious one, but only a ☐ of *Saturn* and ♀. The Sun is Eclipsed the second, but not in our Horizon, nor will it be visible in any part of the World near us; but in the remote parts it happens in the 19. Deg. of ♈. On the 11. day *Sol* enters the Equinoctial Sign *Libra*, making the dayes and nights of an equal length, The Dayes being 12 hours, and night 12 hours. Much comfort is promised to mankind, and we have cause to hope that all things go forward in a successfull way; we mean as unto Trading and other publique Transactions.

Mens affections well settled. Several Addresses made unto Kings and Princes. Debates in sundry Kingdoms and Nations are drawing near unto Conclusion, yea such as have been prosecuted with great vigour.

Intelligence from *France*. The English Nation much honoured. The Weather indifferently seasonable. And wholesome Air this month.

OCTOBER 5 Observations.

Many Treaties are now on Foot, and Ambassadors from several parts of Christendome are now sent forth; some to Renew former Leagues, others to Reconcile National Differences, and to endeavour and procure peace betwixt some disagreeing Nations. Grand Affairs are under Consideration.

In this Month of OCTOBER, Two superiour Planets, viz: Jupiter, and Mars, are in Conjunction in *Scorpio*, and Mercury is in Conjunction with them both in the same Signe. And also *Saturn* and *Mercury* are in Conjunction with *Sagittary*.

Sundry Negotiations in hand in those Kingdomes, Cities, and Countries, under the watery Trigon. Much discourse concerning things at Sea, many Piracies upon the Northern Coasts. Sudden storms, we fear the Breach of Sea Banks, or some violent inundation upon the Northern or North-east Coasts; as also some Land Floods, somewhat prejudicial to the Fens and Moorish places. A probability that Naval Conflicts or Sea Action drawes nigh.

Novem-

1662. November hath XXX Dais.

First Quarter the 8 day 52 minutes past 9 at night.
 Full Moon the 15 day 48 minutes past 2 after noon.
 Last Quarter the 22 day 57 minutes past noon.
 New Moon the 30 day 39 minutes past 5 at night.

NOVEMBER S Observations.

THE many Eminent Conjunctions of the Celestial bodies, intimates lofty Matters now in Agitation, in several Countries in Europe. The influence of this Month seem to spend it self in weighty Councells, and high Consultations; we have now six conjunctions, or Grand meetings, of the wandering Starrs, and four of them are in that Remarkable Sign *Sagittary*, viz. The Conjunctions of *Saturn* and *Mars*, *Sol* and *Saturn*, *Mars* and *Mercury*, *Sol* and *Mercury*, the other two are in *Scorpio*, viz. of *Sol* and *Jupiter*, and *Jupiter* and *Venus*, and these in *Scorpio* are rather of a good Nature, then otherwise. The *Spaniard* or *Spain* it self seem much concerned by some of these heavenly Conjunctions. If the season of the year permit, we may expect to hear of many sharp Conflicts, or some hot disputes, in those places where Armies are on Foot; as also a preparation for some high Design, and that especially in the Eastern and North-east parts of the world, sometimes War, Bloodshed, and set Battles, doth succeed such conjunctions as these,

DECEMBERS Observations.

AS the Configurations of the Stars, in the other two Months, viz. OCTOBER and NOVEMBER, were of great Consequence, so likewise in this Month, we do find the Heavens almost wholly disposed in the same manner.

There is now 5 Conjunctions, 4 of them are in ♈, viz. of ♀ and ♀ *Venus* and ♀, and *Saturn* and *Venus*, and ♀ and ♀, the second time by a direct Motion. The other is of the *Sun* and *Mars* in *Capricorn*, and besides these Conjunctions, there is no material Aspect all the whole Month.

THOSE Regions, Kingdoms, and People, that have the Sign *Sagittary* for their Ascendant, seem wholly designed, in one measure or other, to be sensible of the effects of those many Conjunctions; some great Convention is much talked of. Our *English* Nation seems high, prospers, affrights their Enemies, some people of *Europe* much perplexed in their publique designments. News from the *West Indies*. We fear unhealthful weather.

ASTROLOGICAL JUDGEMENTS, For the Year, 1662.

By William Andrews, *Student in Astrology.*

Astrological Judgements

the Sun into the Equinoctial Signe *Aries* this year, 1661. And to proceed according to our usual manner in former years, (and because we finde at this Vernal Ingress a moveable Signe ascending) we will therefore take into consideration the entrance of the Sun into the other three Cardinal Signes, viz, *Cancer*, *Libra*, and *Capricorn*, likewise : And from the positions of the Heavens and configurations of the Stars, at those times wholly to deduce out Astrological Judgements of this present year 1661.

Very true it is, the Sun is eclipsed, even just at his ingress into *Aries*, it being but 4 hours before; but this Solar Eclipse will not be visible in *England*, or in any parts of *Europe*; for it will appear beyond the Equinoctial Line, about *Green Islands*, near *Nova Guinéa*, and may be seen of such as sail upon the *Indian Sea*, on *Monday* morning the 20th of *March*, at our Two of the Clock, &c. where it will be even total : It also may be observed in the Islands of *Sumatra Borucco*, &c. and in other remote places, though it will be there of a lesser quantity.

Although this eminent defect of the Sun will not be conspicuous with us in *Europe*, yet we conceive, that its effects will operate and spend themselves vigourously in those Kingdoms, Countries, and Cities in *Europe*, under that Celestial Asterism wherein it happens.

The position of the Heavens at this vernal revolution, seem to declare unto the World things of great concernment at hand, and matters of great importance, to be maneged and carried on by some Kingdoms and Nations this year 1661. The Angles of the Figure all moveable, as if the general affairs and transactions of this World would be various, inconstant, and of no great certainty : We have *Venus* excellently fortified, she being in *Taurus* and in the Ascendent, and *Mars* is in *Cancer*, and in his own Triplicity, in the 4th House ; all the other Planets are weak ; some being peregrine and in cadent Houses

for the Year, 1662.

Houses, onely *Jupiter* and *Mercury* are in Angles, the one in the 7th House in *Scorpio* Retrograde, the other, viz., *Mercury* is in *Aries* in the Ascendent.

The position of the Planet *Venus* in the Ascendent so excellently fortified, seems to promise and fore shew much good to the Commonalty and people in general: But we finde the Moon, who is the general significatrix of the common people, or vulgar man, in the 11th House very near the Sun and afflicted by his presence, the viz., the Moon separating from him, and applying to a Trine of that malevolent Planet *Saturn*, now posited in the 5th House in *Sagittary*, and quickly after hastens to the Quadrant of *Mars* Lord of the Ascendent.

This unfortunate position of *Luna*, the being so much opprest by the Lord of the 6th House, viz., *Sol*, who is of a hot and dry Nature, and that in a Signe of the same quality, and her bad Aspects to the other Planets, viz., *Mars*, principally Ruler of the first House, and translating the light of *Saturn* unto him, doth inform Mankind of many Diseases, sudden and pernicious Distempers, and Sicknesses which will molest and afflict the bodies of many people, occasioned from Putrefaction, or over heating of the blood; from whence hot and violent burning Feavers will arise, Small Pox, Measles &c. And pestilential diseases are very much to be feared, even in this Spring Quarter; God Almighty divert this Judgement, so that we may not be in the least measure sensible hereof: The Lord hath been Gracious to us here in *England*, and hath by his special providence kept the City of *London* these many years from the Plague and Pestilence, though there were many causes and reasons to have feared it, especially in the Moneths of *April*, *May*, and *June*, the last year, because of the unhealthful temper of the Weather, at those times, &c. We do still hope that God in mercy will preserve us from that dreadful and devouring disease, even in this very year 1662, if our sins hinder.

Astrological Judgements

hinder not: However, the configurations of Heaven doth portend many diseases, and those of a pestilential quality.

Indeed *Saturn* is in the 8th House, and in opposition to *Gemini*, and this bath no good signification, but doth rather seem to confirm what we delivered even before, and doth also import the death of many ancien people, and those that are of a melancholy nature, Men and women of a Black, Swarthy, Muddy complexion, of a Sulken and Rugged disposition: These, we say, will be much concerned by this evil position of the Planet *Saturn*, his being in that House, which is called by the ancient Astrologers, *Demus Mortis*. But we proceed:

The Moon Lady of the 4th House, weak and much deprest, makes us doubt, that the Country man and industrious Farmer, will receive no great profit of their labours; in regard it is much to be feared, that they will not have such copious Crops of Corn, as in many preceding years: Our Writings and Predictions the last year touching this matter proved too true in many places; we hope it will be otherwise this year, although we have many sufficient testimonies to mistrust the contrary: *Haley* affirms, quando Luna fuerit debilis et peregrina, et applicuerit in fortassis, et illa fortuna sint firma, significat populo malum Statum et casum, depressionem et debilitatem in suis Negociis, desecrum sui victimae lucis et infirmitates multas in Corporibus. And the same Author proceeds further, and saith, That when the Moon shall be in the 11th Houtie, as now she is, significat gentilium climatatis, quod est signis in quo ipsa fuerit, Rixæ et inimicis ac litis: And he addeth also further, and alleageth, That it signifies quod Populus in illo Climate, multos inimicos habebunt, *Haley*, fol. 358.

We do observe that the Planet *Mars* is now in the 15 degrees of *Cancer*, a Watery Sign, and that *Mercury* is in Quartile unto him, he, viz. *Mars* being in his essential dignities, and disposing of *Luna*, *Jupiter*, and *Mercury*; from

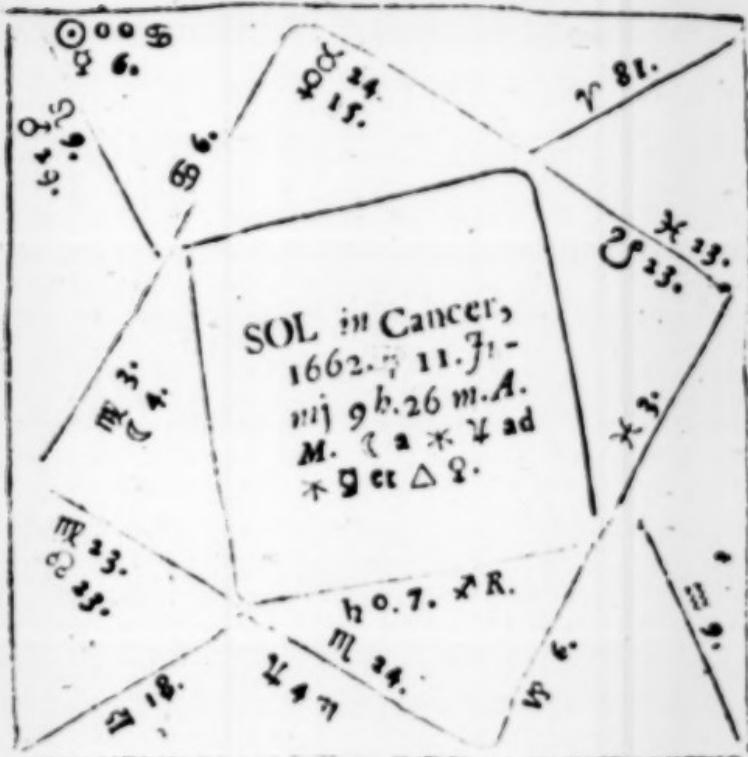

for the Year, 1662.

from whence is signified much Sea action, or an appearance of many Ships upon the Seas, and some Naval conflicts and Sea fights, perhaps Northward, or Northeast be-wixt some potent Nations, as also many Piracies, and shipwrecks, &c.

From the Malitious and Hateful Aspects of some Planets, at this ingress of the Sun, it doth also appear that many Controversies, or hot Disputes, may arise be-wixt some European Kingdomes and Countries, about Sea priviledges, or concerning the Fishing Trade, or customes belonging thereto, which may in time occasion Sea quarrels, or clashing at Sea towards the Norehern and Northeast Coasts; for *Cancer* is a Northernly Signe, and signifieth the Sea, and Maritime affairs: The Countries under *Cancer*, are *Holland*, *Zealand*, *Scotland*, and many others, which are not near us, as *Russia*, &c, and these are under the Moon, as being Lady of that Signe; those Regions will be much concerned by the position of *Mars* in *Cancer*.

Mars is strong and powerful, in an Angle in his own Triplicity; This is an argument of much good unto the English Sea men, and that the English Fleets and Navies shall have good success in their desigments, and be blest with victories over their enemies, if any shall appear in a Hostile manner against them. *Aries* is the Ascent of *England*, and *Mars* is Lord thereof, it is a Masculine, Regal Signe. *Cancer* is a weak, feminine, and phlegmatick Signe, and so is *Scorpio*, wherein *Jupiter* is posited. *Mars* is essentially qualifid, and is better fortifid then *Jupiter* or *Luna*, they being of no strength, and *Mars* disposes of them both, we then say, if any of these people signified by *Jupiter* or *Luna*, molest the English, they must expect bad success.

Astrological Judgements

We now come to the second Figure for this Year, 1662. viz. the Scheam of Heaven at the ingress of Sol into Cancer, being the 11th day of June, 26 min. after 9 of the clock in the morning, which is the first Solstice, and the beginning of the Summer Quarter, according to Astronomical account.

The Celestial Bodies appear in an indifferent calm posture at this time; we mean at this *Solstitia* ingress: We do take notice, that the benevolent Planet Venus is in Taur, in the medium

for the Year, 1662.

medium Cæli, or 10th House, and that the Moon separates from a Sextile of Jupiter, and next applies to a Sextile of Mercury, and to a Trine of Venus.

These configurations of the Stars seem to declare much comfort unto some Countries and People, especially those under *Taurus*, in which Kingdoms and places, according to Natural causes, much of tranquility is promised. The Kingdom of *Ireland* is under that Cœlestial constellation, and so is *Poland*; the Country of *Lorraign*, and also many others. Assuredly *Ireland* will be in a very gallant condition, and the people thereof be made happy in their undertakings, and will be in a most prosperous and thriving state, and receive great encouragement in their ordinary imployment and professions, even to their full satisfaction, &c. The other Countries subject to the Signe *Taurus*, will also, in one kinde or other, be sensible of good, every one of them according to their capacities: Yet *Venus* is hastning to the opposition of *Saturn*, as if some cross Actions or Designes would break forth, and be discovered in some places under the Cœlestial Asterism, before-mentioned, even in the Moneths of *June* and *July*. In our Figure we have the two furious Planets *Saturn* and *Mars*, in square, the one, viz. *Saturn*, being Retrograde, and is returning into *Scorpio*, the other, viz. *Mars*, is remo-

Astrological Judgements

ving out of *Leo* and is entring *Virgo*: Upon consideration whereof, we say, that the before-mentioned Aspect betwixt *Saturn* and *Mars*, is the fore-runner, or antecedent of much Discord, frequent Divisions, and sharp Contests in some parts of the World, and likewise seems to portend the motion of Armies, or Battles, or set Fights, sudden, and sundry actions of that Nature, in some Forreign Countries, especially East-ward, or North-east; as also the besieging or taking of some Towns, Castles, Forts, and the slaughter of Souldiers about Fortifications, &c.

Haly saith, that this Aspect of *Saturn* and *Mars*, significat quod erunt multa, *Furta*, *Latrones*, et *prædones*, multi et manifesti: But this Quartile is in the beginning of *Virgo* and *Sagittary*, therefore the actions, good or evil, which it signifieth, will be manifested in those places, under those Signes, or upon those Seas, in, or near the Moneth of *June*, or beginning of *July*.

In this Summer Quarter we do find, that many Treaties will be on Foot in Europe, and that there will be sundry Negotiations in hand for reconcilement of National differences betwixt Nation and Nation, or Kingdom and Kingdom, much to the advantage of some Countries, and benefit of the people concerned thereby. We portend further, and say, That this position of the Heavenly Bodies, at this ingress of *Sol*

for the Year, 1662.

Sol into *Cancer*, doth most certainly promise much happiness unto all such as are signified by the 10th House, and they are Kings, Princes, and illustrious persons.

His most excellent Majesty of *England* will assuredly be sensible of many blessings, and His Name will be famous in the World; for the Stars doth portend much good unto Him, and that he shall, undoubtedly, vanquish and overcome all His Enemies, either Foreign, or Domestic, and that the *good Hand of God Almighty* will still go along with him in all His Affairs, and what ever plots or wicked contrivancies shall be hatched, or carried on in the least degree (any wayes against Him) by the cunning deceits of His Adversaries, shall be brought to confusion: This is also signified by the applications of the Moon, she separating from a Sextile of benevolent *Jupiter*, and next appliceth unto a Sextile of *Mercy* and Trine of *Venus*, Lady of the 10th House.

We do further perceive, That in the Estival Quarter of this Year, 1662. many Ambassadors and Foreign Agents will arrive in *England*, and will come unto His most excellent Majesty from sundry parts of the World, upon some weighty occasions.

True it is, the planet *Venus* hath the sole Dominion in the Figure of Heaven at this Quarterly ingress, and she is very strong, and in the medi-

Astrological Judgements

medium Cæli, free from misfortune, onely applying to an Opposition of *Saturn*, that malevolent Planet, who is in the 4th. House, which seem to portend hurt to the Fruits of the Earth by sudden Blasts, cold Mornings, Mell-dews, &c. which perhaps will be destructive unto Corn, as Wheat, Ry &c.

But we hasten to our third Figure for this Year, and that is when the Sun makes his entrance

for the Year, 1662.

trance into *Libra*, being the second Equinoctial, or the beginning of the Autumnal-Quarter, which is this Year on *Friday*, the 12th day of *September*, 28 min. after Mid-night, at which time the most glorious Heavenly bodies are disposed in that manner and form as this Scheme demonstrates.

The position and temperance of the Stars, at this *Autumnal* ingress, are very strictly to be considered; for they seem to import much matter of consequence concerning the general Affairs of the World.

We do likewise observe, that there happens many Conjunctions of the Planets, even in this Quarter, viz. in the Moneths of *October*, *November*, and beginning of *December*, which are of great importance unto Man-kinde: Some of them are in *Sagittarius*, a Signe of the fiery Trigon, and in this Constellation *Saturn* and *Mars* are in conjunction, the 5th day of *November* in the Morning; some conjunctions are also in *Scorpio*, and amongst others we find *Jupiter* and *Mars* conjoyned therein, and that is on the 12th day of *October*.

If we judiciously take notice of the preventional New Moen anteceding this ingress, we may finde that the Sun is then Eclipsed, even at that time, viz. on *Tuesday* the second day of *September*, about Noon,
in

Astrological Judgements

In the 9th degree of *Virgo*; yet notwithstanding this Solar defect cannot be visible to us in *England*, in regard of the Moons parallax, but it may be seen in *Guinsea*, a Region of *Africk*, where it will appear a great Eclipse, and also about *Gago, Modinga, Gubar*, and in some places near the Black River it will perhaps be almost total, &c. And because the Eclipse of the Sun in *March*(which we mentioned before) was before the Suns Apogæon, and this in *September* after the Suns Apogæon, and both of them being Central, and near the Nodes, so that there can be no Full Moon Eclipsed this Year, according to that of *Kepler*, *Epico Astrono*, pag. 881.

Amongst the many things observable in this Autumnal Figure, the position of *Luna*, and her Quartile Aspect to *Mars*, are very worthy of serious consideration, especially because the Planet unto whom the Moon applies, viz. *Mars* is in a Humane Signe.

Luna is in *Capricorn* in the 6th House, viz. in the House of Sicknes and Infirmities, and is afflicted by a malitious Aspect of *Mars* out of the 4th House: From hence we may naturally conjecture, That in the Harvest Quarter of this year, 1662. people will be very unneathful and be subject to many Diseases, and that especially towards the latter end of *September*, about *Michaelmas*, or in *October*; for the effects of many Nocivious configurations will operate near

for the Year, 1662.

near those times, perhaps in sundry places.

Mars is now hastning out of *Libra*, and is going into *Scorpio*, and will quickly come to the body of *Jupiter*, who is now in the 4th House likewise: The Angles of the Figure are also fixed, we mean the Horoscope and 7th House: The 10th House and 4th are possessed with moveable Signes; so that we do perceive, that there will be variety of action in the World, especially in the Northern and North-east parts, and also many deliberate and well-advised counsels and consultations on Foot, and many weighty Negotiations will be in agitation in some Foreign Countries, perhaps in *Spain*, or in some of the *Spaniards* Dominions or Territories: Here is also signified the Death of some illustrious person in Europe, either in the *Summer* or *Autumnal-Quarter*.

But

Astrological Judgments.

But we draw near unto conclusion, and are now come to our last Figure of this year, and

that is, when Sol enters Capricorn, which is on
Tuesday, December the 11th, 7 min. past Noon,
at

for the Year, 1662.

at which time the *Winter-Quarter* begins, it being the second Solstice.

In this 4th and last Scheam we have the Planet *Mars* in his exaltation in the *medium Cæli*, very much elevated, and not long after the ingress he is in conjunction with the Sun, viz. on the 24th day of *December* in the Morning; we have also the Moon in *Taurus*, in her exaltation: We do from hence conjecture, that in the *Winter-Quarter* of this Year, 1662. much Matter is preparing for Action. The potency of *Mars* doth seem to fore-shew, that the *English* Nation will be very prosperous and successful in their Affairs.

It is very probable that much action will happen in the *West-Indies*, and in those remote parts of the World; for those Countries are under the Signe *Capricorn*, and *Mars* is posited therein, and the conjunction of the Sun and *Mars* is also in that constellation.

We do also observe, That the many conjunctions of the Planets in the *Autumnal-Quarter*, were most of them in a Fiery, Cholerick, Asterisme of Heaven; we may therefore expect, that the Air will much differ from its usual Temper, and that the Weather will prove warmer and hotter, both in the *Autumnal* and *Winter-Quarter* this Year, than in any former Years; and also many sudden Fires in divers places, from which *Good LORD deliver us.*

BUT

Astrological Judgements, &c.

But in regard the effects of this quarterly Ingress, will manifest themselves but a very little in December: but wil be more apparent in January, February, and neare those times in the year, 1663. Therefore we forbear any further prosecution thereof at this time.

The next year we shall have occasion to speak, somewhat concerning that most Famous Conjunction, of the two superior Planets, *Saturn* and *Jupiter* in *Sagittarius*, which we conceive wil be the forerunner, of some wonderfull matters in the world: but of this at our next meeting, if the Almighty GOD permit life, and Authority give leave.

And thus having finished our Astrologecall discourses of this year, 1662. We do now humbly beseech the Great GOD of Heaven and Earth, who disposeth of all things as he pleaseth, to direct and bless the Affairs of the three Kingdomes of *England*, *Scotland*, and *Ireland*: the good Lord even defend, protect, and prosper His most Gracious Majesty in all His Negotiations, either private or publick, and grant him long life here on Earth, and in the World to come everlasting Glory.

August the 6th.
1661.

WIL. ANDREWS.

FINIS.
